

Creating a Professional Webpage

Three viable approaches

1) No-code Builders (*Wix, Squarespace, Weebly*)

- Polished templates, custom domain. Subscription cost.
- Links: Wix, Squarespace, Weebly

2) GitHub Pages

- Free & durable. Templates like AcademicPages and Minimal Mistakes.
- Links: AcademicPages, Minimal Mistakes

3) Static Site Generators (*Hugo, Quarto, Jekyll*)

- Most flexible, blog/docs integration. Steeper learning curve.
- Links: Hugo, Quarto, Jekyll

Quick Comparison

Option	Cost	Ease	Customization	Longevity
No-code Builder	\$	Very Easy	Medium	You control
GitHub Pages	Free	Medium	High	Durable
Hugo/Quarto	Free	Hard	Very High	Durable

Essential Content

- 1 Home: Name, field, affiliation, short bio, links (Google Scholar, ORCID, GitHub).
- 2 Research: Publications (with DOIs), working papers, data/code.
- 3 Teaching: Courses taught, syllabi, teaching materials.
- 4 CV: Upload a PDF; keep updated.
- 5 Contact: Institutional email, department, professional links.
