

Second Assignment

*****PROVIDE ALL CODE AND ANSWERS/PLOTS*****

1. Load the **Guyer** dataset for the **car** package in R.
 - a. What is the mean value of the variable **cooperation**?
 - b. Produce a box-and-whisker plot that shows how the distribution of **cooperation** varies by **condition**.
2. Generate 100 random numbers like we did with the dice rolls example, but this time use the numbers between 1 and 10.
 - a. What is the mean value of these 100 numbers?
 - b. Now generate 1000 random numbers between 1 and 10. What is the mean value of these numbers?
3. Generate two objects with 100 random values from a uniform distribution between 0 and 1.
 - a. Produce a scatterplot showing the two variables.
 - b. Add a smoother line to the plot. What does this reveal about the relationship between the two variables?
